1. Membership Services Turnaround Time Improvements Being Implemented This Week

JMB Website Supporters' Membership Services operation over the last several months has been testing some new procedures on a cross-section of its activities. For the cross-section of business that utilized the new procedures, turnaround times on business processing were substantially enhanced. Consequently, we are implementing the changes throughout Membership Services to bring these enhanced results to all 29,000 JMB Website Supporters members. Our expectation is that our responsiveness to member needs will improve noticeably for many members. Those who have already received rapid response over the last several months should expect to see that level of response continue.

As always, JMB Website Supporters Membership Services will continue to be a lean operation to

keep costs reasonable. At times of materially increased volume — such as when we have a sale, it may still take several days for new memberships and membership renewals/reinstatements to be processed. Overall, however, all members should expect to realize an enhanced level of response speed throughout the organization effective during the next several weeks.

We are working off a backlog of new memberships, renewals, and reinstatements, and expect that backlog to move to a current status by late this week. If you've been waiting for a renewal or reinstatement to be processed, you should expect all the information you need by late this week.

Thanks for your understanding and your confidence as we implement these new procedures companywide. -JMB
